

## COVERS TRAILER

The all new MowMaster Covers trailer makes rolling or unrolling your covers easy. Its swivel top allows you to un-pin it from its traveling position to 90 degrees sideways allowing you to unroll the covers whilst the vehicle towing the trailer drives along the wicket block which eliminates all excursion of man power. Its unique hydraulic drive set up allows you to tow the trailer with any sort of vehicle, not requiring any PTO drive eliminating any dangers from the machine. Single joy stick control makes it extremely user friendly, also with a built in neutral position which means once you let go of the joy stick the tarp will stop moving, making this the easiest and safest of its kind on the market. Manoeuvrability of this machine is at ease, with the 6 wheels located in the centre of the trailer you can turn it on the spot, allowing you to get into tight storage areas if needed.

Operation performance is the true value of any product "try it"
