

## Pedestrian Cricket Pitch Roller - PR270 -

The all new MowMaster Pedestrian Roller is a completely new concept in Pitch Rolling equipment. The requirements of concentrated down pressure on one roller and the compactness of the unit, allow cross rolling to be outstanding in this product.

The operator has great control of maneuverability with the forward/reverse control leavers being finger tipped controlled at the **ULTRA STEER** operating position .

A variable speed hydraulic power transition also makes control of operation very easy and comfortable.

The machine being so compact, makes it very easy to store. The operator weight and steering distribution have very little disruption, if any to the recovering pitch area whilst cross rolling.

Handling of the PR270 eliminates all exertion of man power so there is no stress on the Operator at all, making this the Safest Pedestrian Roller on the market.

The roller itself has a wall thickness of 28mm and is fully machined for consistency in roundness. This machine is powered by a Honda GX270 Engine coupled to a variable speed hydraulic pump and a huge torque limiter for soft feel forward and reverse.

The machine can be ordered in 3 different weight classes. On top of this, each unit can be ballasted for the convenience of desired weight change.

# **PR270 Specifications**

The MowMaster PR270 also includes some new features to maximize the operators Safety and Comfort which

Include:

Operator Presence on the hand controls to maximize safety

Fully Machined Roller 900x900mm with a wall thickness of 28mm minimum

9HP Honda GX270 Petrol Engine

Rubber Mounted Engine Mounts which reduce up to 70% less vibration

Heavy Duty scraper which includes a Removable Scraper Tray to collect any excess Clay/Clippings from the Roller

1 1/4 Inch Pitch Chain

Heavy Duty Torque Limiter

Front Anti- Tipping Roller System which can be adjusted to suite the users requirements

Fixed speed Settings to allow the operator to be able to keep a nice smooth and consistent rolling speed.

Machine Guards

Directional Stickers on Hand Controls

Height is kept to a minimum (1500mm) to maximize storage ( without Sun Shade )

## **The following Optional Extras are also available**

- Sun Shade ( easily removable, can also be lowered down if storage is a issue )
- Seat ( fully adjustable including a swivel & lock position to maximize comfort and viewing area )
- Electric Start
- Machines Tare Weight is also optional:

Standard - 980kg dry weight and water ballast up to 1580kg

Optional - 1340kg dry weight and water ballast up to 1840kg

Optional - 1700kg dry weight and water ballast up to 2150kg

*Ballast options will be heavier if filled with Sand / Concrete.*
