## **Residential Series**

### **R18—R22**

Since 1947 MowMaster have been producing Australian made commercial Turf Equipment. We have many high profile consumers of our products around the country and internationally, including most major turf wicket venues in Australia, many golf course facilities and all fine manicured turf surfaces which rely on professional equipment to deliver perfect results.

Our introduction to the residential market came by way of demand certain consumers had for better quality lawn mowing equipment. This mower is of heavy duty construction, it has power transmissions that accommodate the heaviest of work loads. Featuring dual clutch transmission, controlled weight distribution, soft touch drive lever, advanced cutting systems, variable height adjustment and powered by a Commercial Honda GX120 engine. If you are looking for faultless capabilities then this product is the one which you need to choose. The machine is available in 18" & 22" cut sizes.
